## EDUCATIONAL... ENTERTAINING

## PLASTICVILLE, U.S.A.

Plasticville, U.S.A. is composed of many and various units with which the builder of a village or city may allow his imagination to hold full sway in the planning and creation of a city to his liking.

Each unit has been carefully selected after a long and intense study. They are designed by leaders of long experience in the plastic arts field and are architecturally correct, adding realism to the village. They are sturdily constructed and will withstand the wear and abuse of children at play.

The various units are so fabricated that it becomes a pleasure for any child to assemble them. Each unit is built to scale, a very important factor to those interested in miniature railroad construction.

Additional units will be added to Plasticville, U.S.A. from time to time, keeping it always up-to-date.

## EDUCATIONAL and ENTERTAINING FOR YOUTH and ADULT

The building of miniature towns, gardens and villages is no longer a seasonal activity but extends throughout the year. It is educational and entertaining for children, developing their minds along creative lines and increasing their observation powers.

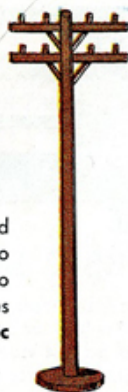

The hobbyist, building a miniature railroad or an attractive village, no matter how large or difficult, discovers that the units of Plasticville, U.S.A. are just the items that fit well into his planning for a realistic village or beautiful countryside. The only limits to a village or city is that of the builder's imagination.

**PLASTICVILLE, U.S.A. IS BUILT TO SCALE  
FOR MINIATURE RAILROADS.**
